

- High light output
- Robust construction
- Hinged front access door
- Multi-directional lamp heads
- Weatherproof IP55 option
- EasiCheck™ central addressable self-test options

Beamlite can be used for a wide variety of interior emergency lighting applications, particularly for warehouses and high ceiling commercial areas. The high intensity light source provides efficient illumination of long, narrow escape routes, but can also provide general coverage of a specific area when aimed at 90° to each other, for such as critical task locations where higher illumination is required. Beamlite has keyhole slot screw fixing holes and a hinged front access door providing ease of installation, whilst the standard twin LED's give separate early warning of failure of each lamp, in addition to mains and charging status. For wet or dusty areas, a weatherproof version is available.

Notes:

1. Spacing achieves 1 lux min on centre line of escape route
2. Aiming angle at 4m height restricted by glare cut-off restriction
3. K factor of 0.55 and S factor of 0.8 have been applied
4. 2 x 55W spacing distances for mounting heights below 10M are same as for 2 x 21W unit.
